EDUCATION

National University - Baliwag — Baliwag City, Bulacan, PH
Bachelor of Science in Information Technology — 4th Year

- **Relevant Coursework**: Data Structures and Algorithms, Web and Mobile App Development, Database Management, Object-Oriented Programming, Information Security, Network and Application Security

CERTIFICATIONS

Information Technology Specialist (ITS) – Cybersecurity

- Certiport - *A Pearson VUE Business* | Credential ID: nxnS-DkqB
- Issued: June 2026 – Expires: June 2031

LEADERSHIP & INVOLVEMENT

Operations Manager – S&R Photography Equipment Rental *(Student-Led Business | 2026 – Present)*

- Managed end-to-end project operations, handling client bookings, digital asset management, contract administration, and full logistics pipelines.
- Directed brand social media channels and digital content production, overseeing scheduling, user engagement, and data tracking to optimize online presence.

PROJECTS

S&R RENTALS: Camera Rental Booking & Operations Platform

Technologies: React.js, Vite, Node.js, Vercel Serverless Functions, Supabase (PostgreSQL), MongoDB, JWT, React Router, Canvas API, Google Analytics 4

- Deployed a production booking platform for a camera rental business, processing **150+ bookings** and tracking **₱60,000+ in monthly revenue**, replaced a manual Google Forms workflow and cut booking turnaround time by **50%**.
- Built the booking flow and an admin analytics dashboard based on actual user needs, on Vercel serverless APIs with JWT auth and a swappable data layer enabling a MongoDB to Supabase migration.

AgriLink: Farm-to-Table Mobile Logistics Platform

Technologies: Flutter, Dart, Firebase Firestore, Firebase Authentication, Xendit, Leaflet API, Android SDK

- Developed a cross-platform mobile application using Flutter and Dart for farm-to-table logistics, supporting multi-role workflows for farmers, buyers, and delivery riders.
- Integrated Xendit API for secure payments alongside Leaflet API for interactive geospatial mapping, route planning, and sub-second live order tracking for riders, deployed as an Android APK.

AI-Enhanced Parish Management Platform

Technologies: React.js, Node.js, Express.js, MySQL, Decoupled Architecture, JWT, Google Document AI, GROQ AI, SMTP, Vercel

- Built a decoupled administrative platform using a React.js frontend and Express/Node.js backend, securing access with JWT-based Role-Based Access Control (RBAC).
- Integrated intelligent automation APIs, leveraging Google Document AI for verification and GROQ AI for natural language queries, deployed fully on Vercel.

SKILLS

Technical Skills

- **Programming Languages:** JavaScript, Dart, SQL
- **Frameworks:** React.js, Express.js, Flutter
- **Tools:** Node.js, Git, GitHub, VS Code, Android SDK, Figma, Canva
- **Databases:** MySQL, Firebase Firestore
- **Cloud & Hosting:** Vercel, Firebase Hosting
- **Other:** HTML5, CSS3, RESTful APIs, MVC Architecture, Decoupled Architecture, Serverless Architecture, Role-Based Access Control (RBAC), Multi-Role Workflows, Project Management
